THE PANORAMA PUZZLE #10 *(April 2018)*
Created by Lisbeth Naber

I started to teach some easy logic puzzles in January. 7 students joined my class. This is the maximum number I can take. I will start a new class in the future. Logic puzzles are hard to solve, and even harder to teach, but I love doing it. I hope you enjoy the puzzle below.

Debbie and her 3 women friends decided to go hiking together. All 4 women live in Panorama.

From the following clues can you determine the first and last name of each woman (one last name is Smith), the footwear each woman was wearing and the color of their jackets?

1. The four women are: Amanda, the one who is wearing a red jacket, the one who is wearing brown hiking boots, and the one whose last name is Meyer.
2. The woman whose last name is Clark (who didn't wear white sneakers) and Carol are neighbors on Chambers Lake Lane.
3. The woman who wears tan hiking boots didn't wear a blue or a red jacket.
4. The woman, who wore a yellow jacket (this wasn't the color of Amanda's jacket) and the woman, who wore brown hiking boots are both members of Panorama Pet Partners.
5. Neither the woman, who wore black sneakers, nor the woman, whose last name is Johnson wore a blue jacket.
6. Neither Belinda (who didn't wear black sneakers) nor Amanda wore a green jacket.

Your Solution to Puzzle #10:

	WOMAN #1	WOMAN #2	WOMAN #3	WOMAN #4
FIRST NAME:				
LAST NAME:				
FOOT WEAR:				
JACKET COLOR:				

Solution to Puzzle #9:

DATE LEAVING:	3/5/18	3/5/18	3/8/18	3/10/18
NAME:	Amanda	Debbie	Belinda	Carol
SKI GROUP:	"Nurses"	"Over the Hill"	"Skiing Seniors"	"Teachers"
COUNTRY:	Switzerland	France	Germany	Austria
